Salesforce To Lay Off Hiring Spree

BY MARK HARANAS

FEBRUARY 4, 2025, 8:55 AM EST

More than 1,000 employees are reportedly laid off. At the same time, the CRM star is hiring upward of 1,000 employees in its portfolio.

Tech PwC lays off 1,500 people from their US workforce

Despite the layoffs, the HR department is being replaced by AI.

- PwC has let go of 1,500 employees in the US.
- That's roughly 2% of its 75,000-person workforce.
- Here's what's behind the headlines — and what it means for the rest of the industry.

The AI Curve for PMs - The 4Cs

Curious

- Reading, exploring, attending events
- AI is a buzzword — not yet a tool

Capable

- PMs using ChatGPT, Copilot, or built-in AI in tools like Jira
- Getting comfortable, still isolated use

Confident

- Integrated into workflows
- AI is saving real time, but tools still disconnected

Catalyst

- Agentic AI flags risks, suggests actions, syncs updates
- PMs move from chasing updates to leading with insight
- Scales PM impact and drives team-wide AI adoption

From Curiosity to Catalyst: Where Are You on the Curve?

For the Capable

- Writing Emails
- Auto Documentation Generation
- Chatbot Communication
- Drafting out Project Plans
- And many many more use cases

Project Management: Yesterday, Today, Tomorrow

Our Present Landscape - No Single Source of Truth

- Project data in various tools - Jira, Smartsheets, Asana, Trello, MS Project, Excel, Word and PowerPoint files
- Communication in Teams / Slack
- Documents in Sharepoint / Shared Dives & Print Media
- Financial data in SAP / Oracle
- Lessons Learned not integrated

So many tools in Silos, Fragmented!

We spend more time gathering information than acting on it.

AI to the Rescue!

The tools we use — Jira, Smartsheets, Asana, Trello, MS Project, Excel, Word, PowerPoint — are all adding AI features.

We now get help to:

 Write,  Summarize,  Translate,  Answer,  Brainstorm

But does this solve the Fragmentation & Silo issue?

**We now have more powerful tools in Silos & Fragmented,
Still No Single Source of Truth!**

and....

How about Security & Data Privacy?

For the Catalyst

Agentic AI

Unlike traditional AI tools, Agentic AI doesn't just respond — it plans, remembers, and executes.

It breaks down complex goals into steps, adapts as it goes, and gets things done across systems.

 **Goal** →  **Planner** →  **Memory** →  **Executor** →  **Action**

Use case - Automate Scheduling, Resource Allocation, Risk Prediction. Task Monitoring, Decision Support, Stakeholder Communication

What is Documenter AI?

Your Private Intelligent, Actionable Project Co-pilot

Plugins
Connects with your current tools

Logos for Microsoft Office (Word, PowerPoint, Excel), Jira, Teams, Google Drive, and Smartsheet.

Portal
Automate with Actionable Workflows

Icon representing automation with a gear, a message box, and a checkmark.

Chatbot
Co-Pilot
Fine tuned AI + Local Augmented Generation

Icon of a white robot head.

Dashboards
Decision Making - Insights & Analytics

Icon of a computer monitor displaying a dashboard with charts and graphs.

Unifies, Automates & Accelerates — All in Your Private Environment. No change in tools or habits needed.

Demo - Documenter AI

Documenter AI - Enterprise Grade Privacy & Security

Data Protection

- **Data residency options (e.g. Malaysia, EU)**
- Audit logs and version control for full traceability

Enterprise Compliance

- **PMBOK 7-aligned processes**
- Supports regulatory standards with detailed traceability

AI Safety & Control

- **Private, fine-tuned LLMs in secure containers**
- Admin visibility into all agent decisions and actions

Deployment Flexibility

- **Available on-premise, private cloud, or VPC**
- Easily integrates into existing enterprise environments.

LLM & Agents privately delivered — no data goes to public models.

Monday Morning, Documenter AI Powered Project Manager

The Project Manager Gets Instant Insights

- Real-time visibility across all workstreams
- **Tasks, deliverables, and risks are automatically tracked**
- Delays and documentation gaps are flagged early
- Smart suggestions guide corrective actions

The AI Co-Pilot Handles the Heavy Lifting

- Drafts documents from templates and past data
- Auto-updates trackers from chats and emails
- **Syncs seamlessly with Jira, Teams, Google Docs, and more**

AI Agents Monitor and Act Proactively

- Continuously scan for risks, delays, and mismatches
- **Recommend fixes before issues escalate**
- Instantly alert the right stakeholders to take action

You're the Pilot, Documenter AI is Your Co-Pilot

What Our Pilot and Demo Customers Are Saying

Enterprise Customers

“Finally, we have an end-to-end system for project management.”

– Pilot user, R&D Project Manager, Company A

“We’re including this in our end-of-year IT budget.”

– Demo customer, Regional Medtech Company

“We’ve had 3 project with compliance incidents this year. This could’ve helped us avoid them.”

– Compliance Officer, Pharma Company

SME & Independent PMs

“The AI co-pilot drafted my scope doc in minutes. That’s a first!”

– Independent PM, Healthcare Projects

“As a small team, we finally feel in control of our projects.”

– Demo user, Project Manager, SME

“I used to spend hours updating 4 systems. Now it’s just one.”

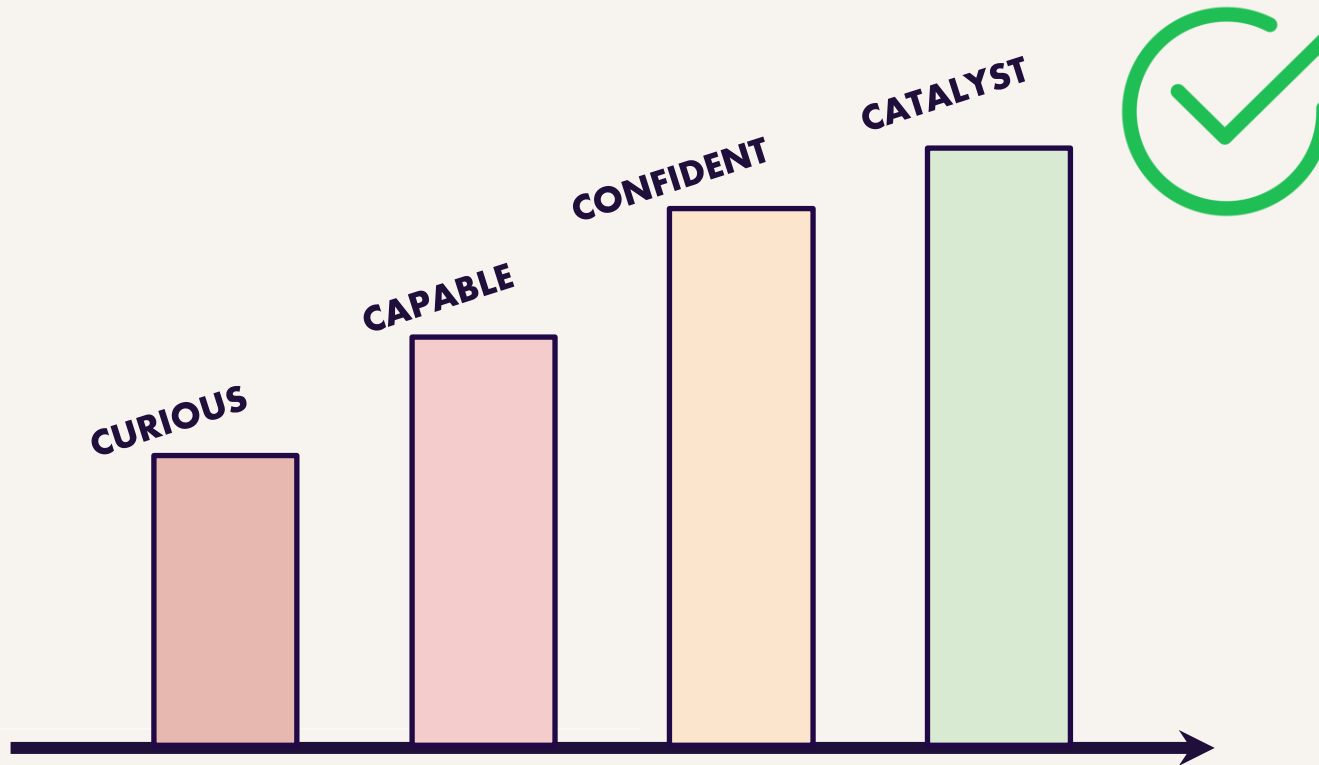

– Pilot user, Consulting Company

How Documenter AI Supports Project Managers

Documenter AI is Built to Be Your Co-Pilot – Not Just Another Tool

-  **Understands context, not just tasks** — from scope to audits
-  **Connects all your tools** — Jira, Docs, Teams, SharePoint, SAP
-  **Writes for you** — scope docs, risk logs, compliance reports
-  **Thinks for you** — flags issues, recommends actions, triggers alerts
-  **Shows you what matters** — smart dashboards, instant summaries
-  **Keeps everything in sync** — no more double entry or update chasing

Everything a project manager needs — finally in one private place.
